

ESG Tools and guidance

The IFC and other Development Finance Institutions offer tools and guidance on E&S risk management and environmental business opportunities.

The ES-Toolkit is IFC's environment and social assessment engine, designed to assist managers of private equity funds in assessing and managing the environment and social risks and opportunities associated with their investments.

FMO has developed practical and easy-to-use [Environmental and Social Risk Management Tools](#) for microfinance institutions (MFIs) and Private Equity Funds.

CDC has developed a [Toolkit on ESG for Fund Managers](#), which helps fund managers add value through effective Environmental, Social and Governance management.

Please visit <https://firstforsustainability.org/resources/tools-and-guidance/> for full details to all the relevant toolkits.
